

What to do if the battery in the energy storage station catches fire

How can a battery energy storage system protect against a fire?

For businesses that use battery energy storage systems, there are several proactive steps that can be taken to protect against a fire. This includes three specific methods: One of the primary methods to combat thermal runaway in BESS is through the use of cooling agents.

Are battery energy storage systems a fire hazard?

As the demand for renewable energy sources escalates, Battery Energy Storage Systems (BESS) have become pivotal in stabilizing the electrical grid and ensuring a continuous power supply. However, the high-density energy stored in these systems poses significant fire risks, necessitating cutting-edge fire suppression solutions.

How do you prevent a lithium battery fire?

The following are some of the preventive measures that can minimise the risk of a lithium battery fire: Only use batteries purchased from a reputable manufacturer or supplier. Protect batteries against being damaged and do not attempt to recharge lithium-ion batteries with any signs of damage.

What happens if a lithium battery catches fire?

If a lithium battery catches fire, immediate action is crucial in order to minimize damage and ensure safety. First and foremost, do not attempt to extinguish the fire with water! This can actually make matters worse by spreading the flames or causing an explosion. Instead, use a dry powder fire extinguisher or sand to smother the flames.

How do you store a lithium ion battery?

Remember to store batteries or products using lithium-ion batteries in a cool dry place away from flammable and combustible materials. Because lithium battery fires create their own oxygen during thermal runaway they can be very difficult to deal with.

Can you put a lithium ion battery in a fire?

Unplug the device from any power sources if it's safe to do so and place the lithium ion battery in a safe, non-flammable area away from combustibles. If a suitable fire extinguisher isn't available, use sand or baking soda to smother the fire.
