

# Where to check the national energy storage policy

What is the 'guidance' for the energy storage industry?

Based on the above analysis,as the first comprehensive policy documentfor the energy storage industry during the '14th Five-Year Plan' period,the 'Guidance' provided reassurance for the development of the industry.

How many provinces and cities in China are implementing energy storage policies?

At present,more than 20 provincesand cities in China have issued policies for the deployment of new energy storage. After energy storage is configured,how to dispatch and operate energy storage,how to participate in the market,and how to channel costs have become the primary issues which plague new energy companies and investors.

What is the 'guidance on accelerating the development of new energy storage'?

Since April 21,2021,the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'),which has given rise to the energy storage industry and even the energy industry.

Will energy storage change the development layout of new energy?

The deployment of energy storage will change the development layout of new energy. This paper expounds the policy requirements for the allocation of energy storage,and proposes two economic calculation models for energy storage allocation based on the levelized cost of electricity and the on-grid electricity price in the operating area.

Can China develop energy storage technology and industry development?

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy,the development of energy storage in China over the past five years has entered the fast track.

When did China release its first guiding-policy for energy storage?

On October 11,2017,China released its first national-level guiding-policy document covering energy storage.

develop energy storage policy and programs, including: a. Lack of clarity as to which use cases (i.e., applications) storage is best suited to serve in decarbonization efforts. b. ...

China currently has no policy measures or market structures that directly support energy storage. However, national policy and grid policy from China's two state-owned grid ...
