How to get rid of static electricity on furniture?

Microfiber is a common fiber for furniture and it is a great conductor for static electricity. However, there are various ways you can get rid of static electricity on furniture. Run a humidifier in the rooms where the static electricity affects your furniture. Dry air worsens static electricity.

Why does my furniture have a lot of static electricity?

If you do not wish to make your own solution, this is something you can consider using. The root cause of your furniture having a lot of static electricity may likely be the fact that your house is too dry. Dry air leads to more static electricity, which is why static shocks are much more common in the chilly, dry winter months.
