

Won the bid for the point-to-point dedicated line lease of energy storage power stations in argentina

Why do businesses need a point to point leased line?

But most businesses need a more secure and reliable connectivity solution, Such as Point to Point Leased Line to operate a vast area network across multiple locations without any loss in performance caused by distance or any other factor. Moreover, you may also want to avoid security risks associated with using public networks.

Are point to point leased lines worth the cost?

It is also a bit more expensive, but the benefits of point to point leased lines are worth the money you spend in getting this connection. The cost of installation of point to point leased lines vary depending on the required engineering work. It is determined when an engineer visits your premises to get an estimate of the work needed.

What is a dedicated leased line?

Dedicated Leased Lines aka Private Lines or Point to Point Circuits, are still a viable, low cost, data network solution. A Dedicated Leased Line is basically a secure, private, dedicated, data network connection between two points over a telecom carriers backbone (not over the Internet).

Can a point to point leased line connect multiple sites?

Point to point leased lines are specifically designed for connecting two sites, so it isn't easy to upgrade or add new locations. If you want to add more than two sites, it can be costly and longer. Your leased line provider may ask you to consider the WAN solution when you need to connect more than two sites.

Is a Point to Point leased line cheaper than WAN?

A Point to Point leased line that does not touch your leased line provider's network is marginally cheaper than the traditional WAN setup because fewer connections are needed to create a two-site solution. However, this cost difference rapidly ceases to be the case if you need to extend the solution.

Who needs a point-to-point leased line connection?

Some organizations, such as WAN network providers, ISPs, data centre providers, hosting companies, IP Telephony firms, and Investment Banks, may find a point-to-point leased line connection appropriate.
